

Brunnera macrophylla 'Silver Heart'

Height: 30cm
Spread: 60cm

FEATURES:

- Large heart-shaped, silver foliage highlighted by crisp green veins.
- Clusters of cobalt blue flowers in early spring (August to September).
- Tolerant to humidity.
- Attractive foliage year round.

SUGGESTED USES:

- Ideal for adding highlights to low light areas.
- Containers for covered patios and decks.
- Edging shady drives or pathways.
- Mass plant as ornamental ground cover.

CULTURAL CARE

Prefers a full shade to part shade location in most well draining soil types. Water needs are moderate but do not allow to dry out over extended periods of heat.

Lightly trim back older foliage after flowering to tidy and apply slow release fertiliser to encourage fresh regrowth from centre.
