## Pratia Snow Angel

*Pratia angulata treadwellii* SNOW ANGEL

Height: 10cm  
Spreads up to 1m

### FEATURES:

- Forms a dense carpet of lush green foliage that will also creep between rocks and crevices.
- Fast and easy to grow in low light areas.
- Studded with dainty white flowers from late spring through to autumn.

### SUGGESTED USES:

- Great cover for difficult sites and will trail over embankments and over walls.
- Mass plant areas for weed suppression.
- Can be grown in containers or baskets where it can fill spaces in a mixed display.

### CULTURAL CARE

Performs best in moist, well draining soils. No pruning is required. Apply a slow release fertiliser during spring for best results. Protect from drying out during extended periods of heat or times of low rainfall.
