

Indigofera decora 'Stupendulous Pink'

Height: 50cm
Spread: 70cm

FULL SUN

MIXED BORDERS

CONTAINERS

FROST TOLERANT

WATER WISE

FEATURES:

- Chains of soft pink, wisteria-like flowers are produced on arching stems during spring.
- A small, deciduous shrub with arching habit and attractive fern-like foliage.
- Frost hardy and water wise.

SUGGESTED USES:

- Great for mixed borders or containers in full sun or low light areas.
- Ideal for cottage or woodland style gardens.
- Suitable for rockeries and slopes.

CULTURAL CARE

Low maintenance and easy to grow in most soil types which are moist and well draining. Water wise once established but should be given occasional deep watering during extended periods of heat. Slowly spreading by suckering if allowed. Prune older foliage and stems in late winter to promote fresh new spring growth. Apply a slow release fertiliser in spring for optimum results.
