

ASTILBE

DARKSIDE OF THE MOON

MIDNIGHT DELIGHT

For a dramatic display, it doesn't get much better than this! Astilbe 'Darkside of the Moon' is a revolutionary form that keeps a naturally domed form with large spear-like magenta and light pink blooms. The stunning foliage emerges as a yellow-bronze with a lovely glossy sheen that becomes a deep purple as it ages. 'Darkside of the Moon' is best grown in full sun to part-shaded areas with adequate watering. Perfect for adding to mixed borders or beds and grown in containers for patios or entertainment areas.

FEATURES

- Compact mound habit
- Stunning foliage colour
- Large flowers from summer and autumn
- Hardy and easy-to-grow
- Cut flowers

USES

- Interest from foliage
- Edging paths, drives and other paved surfaces
- Hardy for commercial landscaping or public spaces
- Container displays for hot, sunny locations
- Small gardens, patios and courtyards

CARE

An easy to grow garden perennial. Will grow best in rich soil types. Apply a slow release fertiliser in spring. Minimal pruning is required, although removing spent flowering stems will encourage further flushes of blooms.
