

Drought info & advice

North West Local Land Services can equip you with the skills and knowledge to help you make the right decisions on your farm.

During dry and tough times, we can give you advice to support your farming business.

We understand you're busier than usual when it's dry too, so we're hitting the road with our team to bring our staff and some drought support information closer to you. No boring presentations or confusing jargon, just a chance to ask questions relevant to you and your property!

Invite a friend or neighbour to come along for a cuppa and ask us how to make the most of the dry times. Morning and afternoon tea is provided.

Ask us more about:

- Drought feeding and stock management
- Animal health and nutrition
- Management of pastures and stubbles
- Provide advice on feed test results
- Provide subsidised testing on water and feed samples*
- Advice on invasive species
- Mixed farming and cropping considerations for winter / summer planting
- Weed and natural resource management

Other rural support services will be available to connect you to the help you need.
