Confirmation of similarity of Q.PEAK DUO modules

Dear Sir or Madam,

Hanwha Q CELLS hereby confirms that the modules stated below all consist of similar components. The main differences of the modules are listed in the table below.

Module Name	Cell Technology	System Voltage	Comment
<i>120-Half-Cell Modules (frame height 32 mm):</i>			
Q.PLUS DUO BFR-G5	6BB Q.ANTUM Multi	1000	Black Frame
Q.PEAK DUO-G5, Q.PEAK DUO-G5+	6BB Q.ANTUM Mono	1000	
Q.PEAK DUO-G7, Q.MAXX	12BB Q.ANTUM Mono	1000	

The cyclone test has been performed for a Q.PEAK DUO-G5 with an asymmetric "G4.4" frame design. Due to similarity the results are also applicable for all above products with the same frame design. Any changes to the frame of the modules would make the results not applicable.

Kind Regards

D. Felsch-Kruse
Director Global QM / FG & CM
Hanwha Q CELLS

M. Schurade
