

Tonsan 1527 – eArc warranty statement

With over 25 years in the market, TONSAN® adhesives have provided innovative engineering adhesive products and system solutions.

TONSAN® are the premier choice of PV module manufacturers in the world, and TONSAN® offer a full line of superior sealing and bonding solutions for crystalline silicone PV modules, bonding and sealing solutions for frameless PV modules, and sealing and bonding for PV system installation.

If the SUNMAN installation manual is followed strictly and TONSAN® silicone applied within its used by date, SUNMAN will provide 10 year installation warranty on the silicone. Tonsan has a design life of 25+ years.

Installers must read and understand this installation guide and site conditions prior to applying the silicone.

SUNMAN has independently tested and certified TONSAN® for installations worldwide in accordance with IEC61215:2016. Different regions may have Different regulations and application methods. Please consult your local representative for further information.
