## Sanitiser for Food Processing Areas

**TWO Pumps  
per  
Spray Bottle  
or Bucket**

# 750ml

Solosan is a quaternary ammonium based drip dry sanitiser which will kill germs and keep surfaces hygienic and ready for safe future use. The product may be used for Spray or Dip sanitising of dishes and utensils.

**DILUTION** Prepare sanitising solution at the rate of one pump (4ml) per 750ml of water. In a typical kitchen, add 7 pumps (28ml) to five litres of dipping solution.

**USE DIRECTIONS** Dishes and surfaces to be sanitized must be cleaned and rinsed thoroughly before applying Solosan. Once surface is clean & rinsed, apply Solosan at rate of Two Pumps per 750ml of water (which is 1:200) via dipping, mister or trigger spray. After 5 minutes of contact time between Solosan and the surface, the surface will then be considered as being "sanitised" and no further surface preparation is generally required.

### STORAGE

Store away from direct sunlight.

**DISPOSAL** Dispose of contents/container in accordance with local/regional/national/international regulations.

**CONTAINS** Didecyl Dimethylammonium Chloride <5%, Water

**HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS.** According to the WHS Regulations and the ADG Code.

In ready to use form, when diluted with water, at or more than 1:10 ( $\leq 100\text{ml/l}$ ) the diluted product is classified as non-hazardous. Recommended dilution is 1:200.
