

MAJOR PROJECT

Adelaide Airport

Stoddart Infrastructure were commissioned by Adelaide Airport to design, fabricate, and install several walkways as part of the 2019 centenary celebrations of the first flight from England to Australia in 1919. A two-stage project, the first of which has been completed and consists of two cantilevered walkways, facilitates patron transfer between the long term car park and terminal building via the Vimy Vickers Memorial – the focus of the celebrations.

For this application the Decco walkway frame was altered to give a more individual aesthetic to the structure. Full-length guttering was included, as well as the integration of custom perforated picture mesh panels with travel-themed motifs between the posts, providing fantastic visual interest to the canopies. Additionally, patron-focused LED courtesy lighting was added for patron comfort.
