TENSION
It is important to check your tension before commencing the garment. 11 sts x 6 rows to 8cm, 3ins over trebles on 6mm hook. If there are too many stitches to 10cm, then your tension is tight and you will need to change your hook to a larger size. If there are too few stitches to 10cm, then your tension is loose and you will need to change your hook to a smaller size. The shawl is constructed from a series of 12 Panels, which are joined together as work progresses.
