Use Of Amusement Device In Council Parks, Land Or Reserves

Conditions Of Permit And Application Form

The use of an amusement device, as defined by Safe Work SA under the Work Health and Safety Regulations 2012 (SA) (WHS Regulations), (such as jumping castle, rides, climbing wall etc), must complete this form in addition to the Special Event Permit Application. **Late and incomplete applications may not be approved.**

1. FEES

Fees will be charged as per Councils Fees and Charges Schedule.

2. APPROVAL

Parks, Land & Reserves are often booked well in advance. Please **do not** send invitations or promote your event unless written approval has been granted.

Permit applications should be submitted at least ten (10) business days prior to your event. Late or incomplete applications may not be approved.

Approved locations (Indicate desired location)

- Clonlea Park
- Pioneer Park
- Apex Park
- Dead Man's Pass

Supplying Company Telephone No

6. INSURANCE

The applicant must supply Council with a copy of the amusement structure supplier's Certificate of Currency showing public Liability Insurance of at least ten (10) million dollars (\$10,000,000).

7. AMUSEMENT DEVICE REGULATION

The amusement device must conform to the Australian Standard AS 3533-1997.

Please supply a copy of the current registration for the proposed amusement structure if required under the amusement device Regulation (Platform height over 3m)

8. CONDITIONS OF USE

- The amusement structure must be designed, constructed, maintained and operated in accordance with Australian Standards 3533.1 – 3522.4, (as applicable) together with the manufacturer's instructions and any other relevant regulation, code of practice or guideline.
- Each amusement structure, whilst operating, must be under the supervision of a competent adult.
- The supplying Company must ensure that at all times the structure is covered by Public Liability Insurance Policy to the value of at least ten million dollars (\$10,000,000).
- The Structure must not be erected or operated in wind velocities exceeding 45km/hour or such lesser amounts as prescribed by manufacturer's instructions or any other relevant regulation, code of practice or guideline. If the wind velocity approaches this figure the structure must be cleared and made safe (and, if necessary, deflated) immediately.
- The structure must be held down securely at all times whilst in operation. If any part of the holding down system becomes detached, it is the Supplying Company's responsibility to clear all persons from the structure (and, if necessary, deflate it) until such a time as it can be securely restrained.
- Inflatable structures must have a minimum setback of 5 metres from all playgrounds, children's play equipment, barbecues, overhanging trees and buildings, footpaths and roads.

DECLARATION BY SUPPLYING COMPANY

I, _____, being a representative of the Supplying Company, certify that

- The amusement structure is registered;
- Public liability of at least ten (10) million dollars \$10,000,000 is current;
- The structure will be maintained and operated in accordance with manufacturers instructions, relevant Australian Standards, codes of practice and/or guidelines
- The conditions of use outlined above will be abided by.
