

Don't leave home without it

The main reason for you to be using Morey's Heavy-Duty Oil Stabiliser is to prevent and help to reduce the risk of costly breakdowns. These breakdowns could be engine failure due to low oil pressure, gearbox breakdown in both automatic or manual, and differential breakdown due to excessive wear. Morey's Heavy-Duty Oil Stabiliser, with its advanced supplement technology, is designed to blend with any mineral-based, semi-synthetic and fully synthetic oils. This includes engine oils automatic transmission oils, manual transmission oils, and differential and power steering oils. Morey's will give you the peace of mind that you are doing the best you can to look after your vehicle. Whether you are driving around town, driving interstate, four-wheel driving or towing, you will benefit from the use of Morey's HD Oil Stabilizer. A regular serviced vehicle is not everything you should do. Oils break down due to excessive heat and over working, this could be from incorrect oil use, towing and irregular servicing intervals.

The Morey's Heavy Duty-Oil Stabiliser's proven features increase stability in your oil, improving its lubricity and life. It also prevents metal-to-metal contact (reducing heat); improves oil pressure; reduces fuel consumption; reduces sludge-oil contamination; reduces condensation and toxic exhaust emissions; and will help with smoother gear changing in both automatic and manual transmissions. Morey's Heavy-Duty Oil Stabiliser also eliminates dry starting, which, in turn, reduces the overall wear on your vehicle.

Morey's Heavy-Duty Oil Stabiliser is available from all good automotive and truck spare parts suppliers and bearing supply stores. Don't forget to look out for other Morey's products. Morey's: ask for it by name!
