MOREY'S HEAVY DUTY OIL STABILIZER

MOREY'S HEAVY DUTY OIL STABILIZER is formulated using advanced additive technology to stabilize all engine, gear and hydraulic oils, including synthetic and semi-synthetic types. It simply makes oil perform better in all types of engines, gearboxes, differentials, transmissions and hydraulics, regardless of the brand you use. MOREY'S boosts the oil's performance and the vehicle's performance as well, be they new, newly rebuilt or worn.

Features & Benefits:

- Reduce operating temperature in engines, gearboxes, differentials & Hydraulics.
- Stop piston wash during cold weather idling.
- Eliminate dry starts – increased engine and gear life.
- Improve and sustain oil pressure.
- Protect against high temperature viscosity loss.
- Insure against oil breakdown in case of sudden overheating.
- Reduce oil consumption & emissions.
- Extend life of regular oil in all applications.
- Smooth & cool hydraulic operations.
- Reduce noise in transmissions & differentials.
- Improve cold temperature starting: to minus 40°C.
- Reduce heat, slip, grab, and leaks in automatic transmissions.
- Stop blow-by. Horsepower is increased.
- Has higher index to resist thickening or thinning of oils.
- Improve engine & component cleanliness.
- Improve rust & corrosion protection.
- Reduce seal leakage.
- Diesel Particulate Filter (DPF) compatible.
- **NZFSA Approved C 11.**
