Season Three of All Things Equal has launched...

We pride ourselves on an egalitarian society, but how equal are we? *All Things Equal* is an investigative podcast, going to the root of inequality in our society. We'll take you to meet the people affected most, and those trying to turn things around.

Digital Divides: Teaching the Future

ALL THINGS EQUAL

Education will be as affected as everything else by technology, not just because of the innovations coming into the classrooms, but because of the students we need to send out.

Season 1: After #MeToo, explores gender, power, and what feminism means today through real women's stories.

Season 2: We look at the great equaliser — education. We discover what happens to kids who fall between the cracks and meet some remarkable people who've been there to catch them.

Season 3: We live in an age of disruption. Technology has reshaped all aspects of life on the planet. Every advance offers exciting possibilities, but also unintended consequences. Traditional social structures are being challenged, remade or destroyed, for better or worse. Human rights are not immune to the challenges posed by our new tech-defined reality.

All Things Equal is a 2SER podcast made in collaboration with the Centre of Social Justice and Inclusion at the University of Technology Sydney.
