\*1: Ink droplets can be placed with a pitch of 1/4800 inch at minimum.

\*2: Document print speeds are the averages of ESAT (Estimated Saturated Throughput) (Word, Excel, PDF) in Office Category Test for the default simplex mode, ISO/IEC 24734. Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc.

\*3: Paper types NOT supported for borderless printing are as follows: Envelope, High Resolution Paper, T-Shirt Transfer, Photo Stickers

\*4: Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard.

\*5: The performance of the printer may be reduced under certain temperature and humidity conditions.

\*6: For the temperature and humidity conditions of papers such as photo paper, refer to the paper's packaging or the supplied instructions.

\*7: Acoustic Noise is measured based on ISO7779 standard with default setting.
