TOKN Assist

“ Automate repeatable tasks and boost efficiency at a fraction of the price.

Powered by 

Benefits

- Easy access to paperless rosters & timekeeping, in the palm of your hand, up-to-date and there when you need it.
- Zero back office duplication of work and no re-entry of time & bookings.
- Increased customer satisfaction with more time for clients and less time on administration.
- Instant reach to all carers in the field.

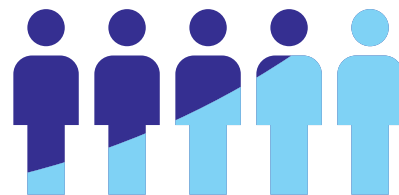

More efficient and safer frontline services. Community care workers are better informed with the most up-to-date information. They have more time for their clients and waste less time on the paperwork.

Realtime access to rosters and client information. Wherever you are, the TOKN Assist App is easy to use and in the palm of your hand. TOKN Assist is a simple design providing up-to-date rosters and appointments instantly, with clever map integration making it easier to get around without wasting valuable time.

Confirm appointments as they happen. Instantly confirm your schedule as you go with less room for errors. Make your carers' job a breeze, add notes, access documents, complete shifts,

Saving on back office administration

546 hrs per year

capture client signatures and more - right from their own device. Information is instantly available via the TOKN Cloud, meaning the back office does not need to re-enter anything. This saves time and money when organising the carer schedule.

The latest technology. Backed by the award winning TOKN enterprise platform, the TOKN Assist App is the latest mobile solution for community care organisations, without the disruption. You only need to register your account to start improving your practice today. TOKN Assist works on all the devices your team currently use including IOS, Windows & Android.
