

ASX Announcement

12 February 2018

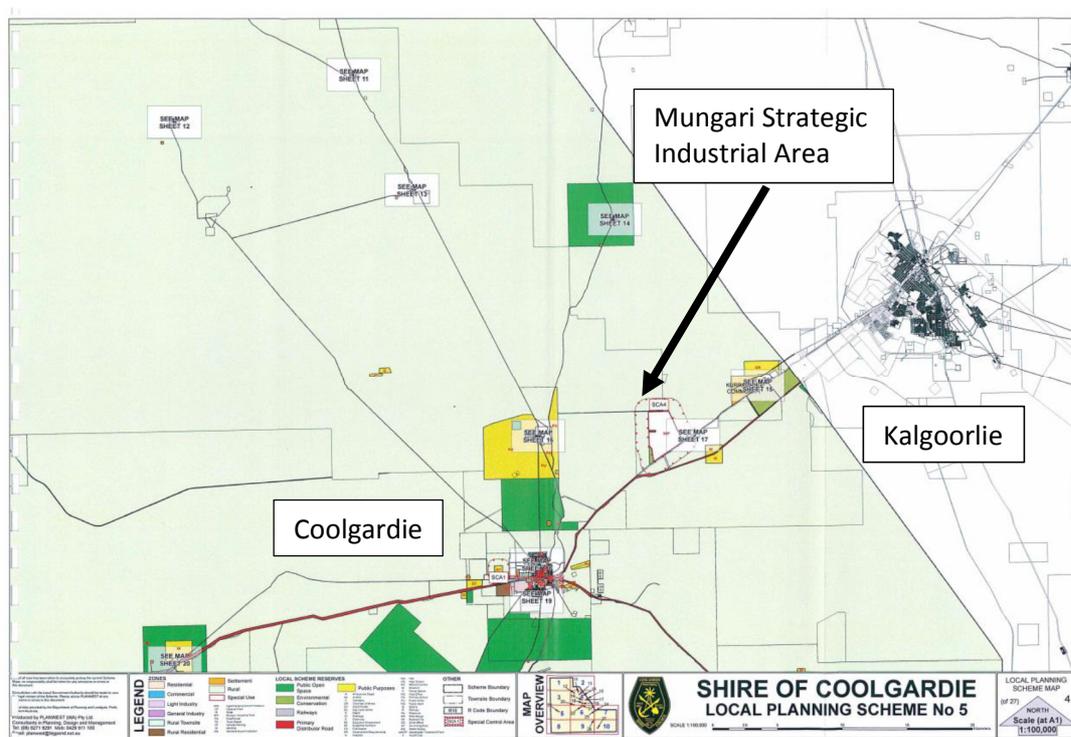

Mungari Solar Farm

- Carnegie Clean Energy has been successful in an application to negotiate 100MW solar and 20MWh battery site in Western Australia.
- The Mungari Solar Farm site is in the Buffer Zone of the Mungari Strategic Industrial Area (MSIA), which is located approximately 26km south-west of Kalgoorlie and 13km north-east of Coolgardie in Western Australia.
- The Mungari Solar Farm would supply clean energy to the Eastern Goldfields, which has significant electricity supply constraints.

Carnegie Clean Energy Limited (ASX: CCE) is pleased to advise that after a competitive process, the Western Australian Department of Jobs, Tourism, Science and Innovation (JTSI), in collaboration with LandCorp, has awarded it in-principle approval to negotiate a lease for 250ha within the Buffer Zone of the Mungari Strategic Industrial Area, to build, own and operate a solar farm.

The proposed solar farm will be up to 100MW and include up to 20MWh of battery storage.

The MSIA is located approximately 26km south-west of Kalgoorlie and 13km north-east of Coolgardie in Western Australia, along the Great Eastern Highway.

Carnegie’s Managing Director Dr Michael Ottaviano commented,

“Carnegie has a strong track record of developing greenfield sites into shovel ready renewable projects rapidly and responsibly, most recently with its Northam Solar Farm.”

“We are excited to play a role in the development of the Mungari Strategic Industrial Area, which has an important role in the future economic prosperity of the Eastern Goldfields and look forward to working closely with local industries seeking sources of clean power generation, the State Government, local governments and other key stakeholders in bringing this project to fruition.”

The development of the Mungari Solar Farm is conditional on reaching suitable lease arrangements with Department of Planning, Lands and Heritage and the results of a Feasibility Study, including consultation with Western Power for grid connection.

About Carnegie Clean Energy Limited

[Carnegie Clean Energy Limited](#) is an Australian, ASX-listed (ASX: CCE) wave energy technology developer and solar/battery microgrid project developer. Carnegie is the 100% owner and developer of the CETO Wave Energy Technology intellectual property and is also 100% owner of leading Australian battery/solar microgrid Engineering Procurement and Construction (EPC) company Energy Made Clean (EMC). EMC specialises in the delivery of mixed renewable energy microgrid projects to islands and remote and fringe of grid communities. Carnegie is the only company in the world to offer a combination of wave, solar, wind, storage and desalination via microgrids which are ideally suited to islands, off grid communities and fringe of grid locations.
