

Shamir

Australian Made Spectacle Lenses

Shamir Australia is recognised by the Australian Made Campaign for its production of high quality prescription, surfaced lenses and coatings at its Australian laboratory based in Lytton Queensland.

Find out more about Shamir's premium progressive lenses, Shamir Autograph Intelligence™ and Shamir Autograph III™, below.

Shamir Autograph Intelligence™

Shamir Autograph Intelligence™ is a multi-award winning progressive lens! This lens has won awards in the United Kingdom, Spain and Portugal!

Shamir Autograph Intelligence™ is Shamir's most advanced premium progressive lens and it feels like wearing single vision lenses. It also uniquely adapts to each wearer's visual needs based on their Visual Age™.

Who it's for

Those demanding the most technologically advanced, and most precisely personalised lifestyle lenses.

Outdoor

Clear distance vision, providing excellent vision while outdoors, travelling and driving.

Reading

Wide, clear reading zones for comfortable reading and sharp vision.

Digital Zone

Perfect vision for computer and mobile use.

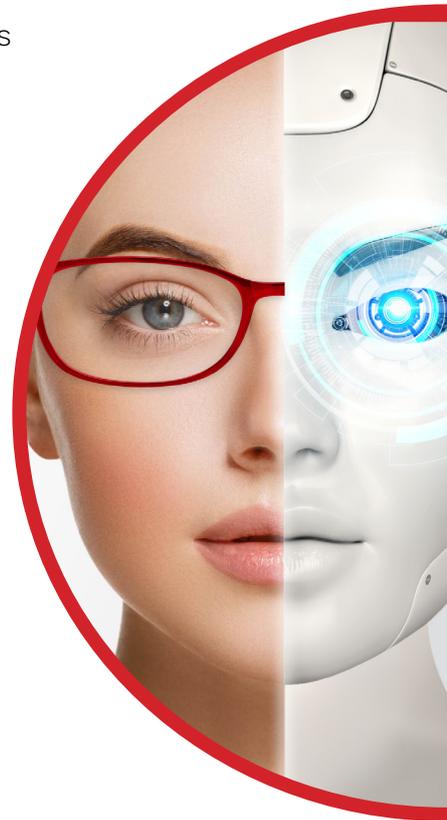

Dynamic

Seamless transition in all viewing angles and directions.

Customised

Crystal clear vision with advanced lens technology designed to automatically adapt to your visual requirements.

Shamir
Autograph III™

Based on a ground breaking concept in lens design, Shamir Autograph III™ is a balanced progressive lens, holistically adapted to the patient, ensuring a clear and comfortable visual experience for all.

Shamir's R&D team focused on the fact that although their lens design is the same, each patient's perceived viewing field is significantly different, based on their prescription. A minus power lens increases the field of view, while a positive power lens has the effect of reducing the field of view. This results in hyperopic patients experiencing a narrower viewing field than that experienced by their myopic counterparts.

Who it's for

Those demanding the best lenses that optimally accommodate any individual prescription.

Outdoor

Clear distance vision, providing excellent vision while outdoors, travelling and driving.

Reading

Wide and clear reading zone with comfortable, sharp vision.

Digital Zone

Excellent vision for computer and mobile use.

Dynamic

Smooth transition in all viewing angles and direction.

Customised

Incorporated with individual lens design and technology.
