

Anti-Ligature En-Suite Door Set 138150

DATASHEET

Award-winning door with no known ligature points

- ▶ Leaves detach if a ligature is attempted, at 8kg load.
- ▶ Strong magnets and pivot mechanism avoid leaves detaching during day-to-day use.
- ▶ Magnets can't be removed or ingested.
- ▶ Soft, lightweight leaves minimise weaponisation.
- ▶ Retrofits in under 60 minutes.
- ▶ Less up-front and running costs compare with alternatives.

LIMITATIONS OF EXISTING OPTIONS

In-depth research has revealed the limitations of existing solutions:

- ▶ Any two hard surfaces meeting creates a ligature point.
- ▶ Load release is the only safe option

Cut-Down Door

- ▶ Multiple ligature risks on door frame, hinge and gap
- ▶ Can be used as both a weapon and hiding place

Full Door with Door-Top Alarm

- ▶ Low-level anchor points pose risk of bed sheet ligature
- ▶ Limits observation when bathroom in use

Side-Hung Magnetic Door

- ▶ Side-hung magnets detach too easily, so impractical
- ▶ Strong magnets in fabric can be removed and swallowed, causing internal injury and even death

No Door/Curtain

- ▶ Lack of dignity and privacy
- ▶ Curtain blocks observation and requires regular replacement
- ▶ Doesn't emulate home environment

LIFE SAVING SOLUTION

Our en-suite door restores dignity and independence, as well as setting new standards for safety and design.

ENABLES PARTIAL OBSERVATION; PROVIDES DIGNITY

Like cubical doors in a leisure centre, the door acts as partial visual screen to preserve service users dignity.

Yet it also allows observation of head and feet to give clinicians peace of mind.

MINIMISES LIGATURE LEARNING

There's an option to allow staff-only reattachment - with a quarter turn of the staff key engaging the magnet - so a detached door leaf can inform clinical risk assessment.

This discourages service users from even attempting to tamper with the door, as well as minimising the opportunities to try

ENHANCES SAFETY

The door is tested to TS001 standards, and there are no known ligature points on the pivots or leaves.

The leaves detach if a ligature is attempted, but stay in place during day-to-day use - ensuring they are practical.

When detached, the leaves are an ineffective weapon because they are soft and lightweight.

MANUFACTURING WARRANTY

Hipac Safehinge Primera En-suite Manufacturing Warranty

The Manufacturer's warranty guarantees the en-suite foam door leaves and magnetic frame pivots against material and manufacturing defects for a period of one year from the date of sale.

The guarantee will provide for the free replacement of any element proved to be of faulty manufacture or material defect following inspection.

The onus is on the buyer to ensure that the products have been correctly specified as being fit for purpose and that the products are installed, commissioned and maintained strictly in accordance with Manufacturer's fitting instructions.

[Fitting Instructions available upon request.]

ABOUT HIPAC

We are an Australian healthcare company that guarantees to stand behind all our medical products, both manufactured and imported, because we're here for the life of our products and clients.
