

## Perspex® Cast Acrylic Sheet Fluorescent

Available in a range of thickness options and a choice of surface effects

The fluorescent edge effect is one of THE most popular choices of designers and fabricators who want their ideas to catch the eye. Perspex® Fluorescent combines a delicate transparent tinted sheet with a striking fluorescent edge perfect for interior signs, POS displays and in-store retail media.

And because its physical properties are identical to normal Perspex® Cast Acrylic sheet, the Perspex® Fluorescent range is easy to shape and fabricate, making the most complex and intricate designs easily achievable.

Perspex® Fluorescent is available in a range of five colours, either as a double sided gloss or a double sided anti-reflective finish; each designed to make your ideas stand out from the crowd:

**Helios Yellow** – a fresh sunny yellow

**Lava Orange** – a warm glowing orange

**Mars Red** – a bright, intense red

**Acid Green** – a strong sharp green

**Neptune Blue** – a deep vivid blue
