Working with Western Union® Business Solutions, a specialist in international payments and foreign exchange, we can facilitate sending and receiving money around the world in quick, reliable and affordable ways.

So whether you're sending money to family, friends or business suppliers and merchants overseas, or receiving an international payment – we can help.

How do I send money overseas?

Sending money via Telegraphic Transfer (TT)

Available in more than 130 currencies, a Telegraphic Transfer (also known as a “Wire”) is an electronic transfer of funds directly credited to a beneficiary’s overseas bank account.

Why should I use a TT?

- » In most cases a TT is the quickest way to send funds abroad (a TT will normally take two to three business days to reach the beneficiary)
- » Sending a TT in the beneficiary’s currency is usually more cost effective and helps ensure the funds are credited more quickly, as the payment can go “straight through”¹

What details do I need to send a TT?

You will need to provide full details of the receiver’s bank account, including their IBAN (International Bank Account Number) if they are in Europe.

To comply with Australian Government regulations you must also provide the beneficiary’s full street address.

¹ Please note that TT’s are sent via a network of correspondent banks, which sometimes levy a small handling charge on your payment. Any such fees, and payment delays, are out of our control.

Let them know you care,
no matter where they are.

Sending money via Draft

A Draft is like a bank cheque made out in a foreign currency. It's another way for you to make payments and settle a transaction overseas, especially if you don't have the receiver's electronic bank account details.

Drafts can be sent overseas via mail and are available in 24 different currencies.

Why should I use a Draft?

- » When the sender doesn't know the recipient's account details
- » When you're sending a small amount of money
- » When you want to send a payment by mail with a letter, card or invoice
- » When a certain level of security around payment is required – Drafts are a non-negotiable instrument and can only be credited to the payee's bank account, unless the payee has endorsed the draft

Need to wish her a
Happy Mother's Day?

Did you know that...

Sending AUD overseas can create additional costs for your recipient

By sending a TT in the beneficiary's currency you generally receive greater certainty on your payment – you can effectively “lock-in” the exchange rate, and know exactly how much is being transferred.

When you make a transaction in AUD you may not know what a foreign bank will charge and what foreign exchange rate they will apply, and hence it may be difficult to find out how much will be credited to the beneficiary's account.

We generally only suggest sending funds in Australian Dollars if the beneficiary holds an AUD account with the overseas bank; in all other cases, we suggest funds should be sent in the beneficiary's (i.e. payee's) currency.

Paying by credit card can actually increase the cost of your international bills

When paying by credit card it may be difficult to find out how much it will cost you when the Foreign Exchange and other fees are applied to your transaction by the correspondent banks. You will find out when you see the final cost in your credit card statement.

**Pay your international bills
with confidence and ease.**
