

THE HYDROTHERM MAKES SOLAR HOT WATER SIMPLE

AFFORDABLE

The HydroTherm uses just a fraction of the energy of a traditional electric hot water heater. Therefore it is guaranteed to cut your energy bill and save you money.

FUNCTIONAL

The HydroTherm has no unsightly roof panels and can be connected into existing household plumbing hassle free. It is quality built and reliable providing hot water 24/7 365 days a year, rain hail or shine. To ensure you never go without, every HydroTherm comes with a marine grade stainless steel tank, which is large enough and strong enough to meet all your families' hot water needs.

ENVIRONMENTAL

The HydroTherm is a true solar solution cutting down on carbon pollution, making it great for the environment. By installing a HydroTherm Solar Hot Water System you will be helping to reduce your families' carbon footprint and make Australia a more sustainable country for future generations.

OUR SYSTEM TICKS ALL THE BOXES

- ✓ A system that is large enough to provide hot water for your whole family.
- ✓ A system that is always working, to deliver hot water when you need it most.
- ✓ A system that is affordable to purchase and easy to install which cut's power bills and saves you money.
- ✓ A system that is great for the environment and helps fight global warming.
- ✓ A system that looks good, is compact and does not need roof panels.
- ✓ A system which receives government rebates so you pay even less.
- ✓ A system independently tested in Australia, for reliability and performance.
- ✓ A system designed by Australians for Australia's weather conditions.
- ✓ A system built to last with warranties that you can trust.

AUSTRALIA'S LEADING GUARANTEES

HydroTherm's manufacturers don't just claim to have Australia's toughest solar hot water systems, they back them up. Like the 15 year warranty they offer on every tank they build - that's more than double the protection of competitor brands!
