

FIGHT BACK WITH A SOLARARK EVACUATED TUBE HOT WATER SYSTEM. YOU CAN DRAMATICALLY REDUCE YOUR HOT WATER ENERGY COSTS BY UP TO 90%

With solar hot water you'll not only save money, but you'll help our environment too.

According to the Australian Government, water heating is the largest single source of greenhouse gas emissions from the average Australian home, accounting for around 28% of home energy use, excluding the family car*.

In fact, solar hot water systems are so good for our environment that government rebates exist to make it easier and more affordable for you to install a solar hot water system.

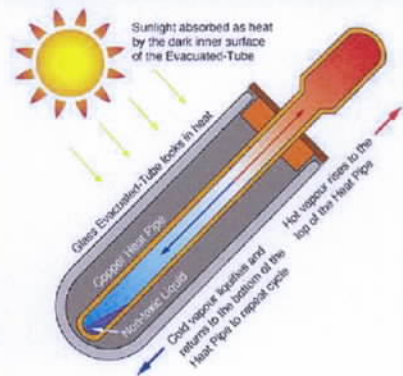

How much money can I save per year?

Heating water with electricity can be about 28% of your power bill. According to the Australian Government, a solar hot water system can save between \$300 and \$700 every year off electricity bills*. With savings like these, your solar hot water system could pay for itself more quickly than you think. *This statement is general. Actual savings may vary depending on location, type of supply and consumption.

Why SolarArk Ticks All The Boxes

- ✓ IT'S AUSTRALIAN MADE!
- ✓ SolarArk is a superior, high quality product backed with a 15 year warranty.
- ✓ SolarArk is designed by Australians for Australia's extreme weather conditions.
- ✓ SolarArk is affordable to buy, cut's power bills, saving money with a fast return on investment.
