ORAL ANTHelmINTIC FOR SHEEP, GOATS AND CATTLE
Contains Fenbendazole (25g/L), a member of the benzimidazole family of drenches. It is effective for the control of sensitive gastrointestinal roundworms and lungworms in sheep, goats and cattle, and it aids in the control of tapeworm and whipworm in sheep and goats. It is effective against sensitive strains of the following internal parasites.

**SHEEP/GOATS**
- Haemonchus contortus
- Ostertagia spp
- Trichostrongylus spp
- Chabertia ovina
- Oesophagostomum columbianum
- Nematodirus spp
- Cooperia spp
- Dictyocaulus filaria

Aids in the control of:
- Moniezia expansa
- Trichuris ovis

**CATTLE**
- Haemonchus placei
- Ostertagia spp
- Trichostrongylus spp
- Oesophagostomum radiatum
- Nematodirus spp
- Cooperia spp
- Dictyocaulus viviparus
- Trichuris spp
- Capillaria spp

*In goats, Fenbendazole is effective against susceptible strains of Ostertagia and Trichostrongylus.

**DIRECTIONS FOR USE:**
Shake container well before using this product.

**RERAINTS:**
DO NOT USE in female sheep which are producing or may in the future produce milk or milk products for human consumption.

**ADMINISTRATION:**
WSD FENBENDAZOLE can be administered orally through standard accurate drenching equipment. Clean equipment thoroughly before and after use.

**DOSE RATES:**
Dose mob to the heaviest animal by liveweight in each group (ewes, wethers, rams, lambs); (bucks, does, kids); (bulls, cows, steers, calves) and these should be weighed with scales or weighband. Do not underdose. Where there is a large variation in size within the group, dose rates should be based on the label directions for each weight range. Drafting into two or more lines may be appropriate to avoid excessive overdosing.

Internal parasites may develop resistance to drenches (anthelmintics). Ask your local veterinary adviser for recommended parasite management practices for your area to reduce development of resistance. It is advisable that a drench resistance test be conducted before any drench is used. If drench failure with this preparation is suspected, seek veterinary confirmation and notify the manufacturer.

**PRECAUTIONS:**
Allow 7-days or greater between dosing with WSD FENBENDAZOLE and Bromsalans.

**WITHHOLDING PERIODS:**
MILK (Sheep): DO NOT USE in female sheep which are producing or may in the future produce milk or milk products for human consumption.

MILK (Goats): Milk collected from does within twenty-four (24) hours following treatment MUST NOT BE USED for human consumption or processing. This milk should not be fed to kids.

MILK (Cattle): NIL.

**SAFETY DIRECTIONS:**
Harmful if absorbed by skin contact or swallowed. Avoid contact with skin. Wash hands after use.

**MATERIAL SAFETY DATA SHEET (MSDS):**
Additional information is listed in the Material Safety Data Sheet, which can be obtained from the supplier.

**PROTECTION OF FISH, CRUSTACEANS AND THE ENVIRONMENT:**
Dangerous to fish. Do not contaminate streams, rivers and waterways with the product or used containers.

**CONDITIONS OF SALE:**
All Western Stock Distributors products are of a high quality, being subjected to rigid quality control. The manufacturer, however, is unable to control the product’s subsequent handling or use or the circumstances of each handling or use. This product is sold on the express condition that neither the manufacturer nor the distributor is under any liability for any loss or damage that may arise through such handling or use. If these conditions are unacceptable the container should be returned unopened for credit.

**WESTERN STOCK DISTRIBUTORS:**
A.B.N. 58 009 372 525
Koojan Avenue,
South Guildford WA 6055
Telephone: (08) 9277 5013

**DISPOSAL:**
Do not dispose of undiluted chemicals on-site. Break, crush, or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

**STORAGE:**
Store below 30°C (room temperature) in the closed, original container in a dry, well-ventilated area, and protect from sunlight.
