Carefully administer the capsules by following these directions:

1. CONTROL THE ANIMAL

   The must have complete control of the animal at all times. Work in the nose and immediately each sheep high or the next, ensuring to keep the dose even on right.

2. HOLD HEAD AND NECK AT THE CORRECT ANGLE

   The angle between the head and neck must be straightened to the dosing applicator in the mouth close up with the guider.

   THE CORRECT ANGLE MUST BE ACHIEVED BY LETTING THE ANIMAL COOL, KEEP COMPLETE CONTROL OF THE HEAD AND NECK WHILE DOSING.

   NOTE: WITH AN INCORRECT ANGLE OR UNDE FEED, THE OPERATOR CAN PUNCTURE THE BACK OF THE THROAT CAUSING FATAL INFECTION.

3. LET THE SHEEP'S "SWALLOW" PULL THE CAPSULE INTO THE RING

   Hold the applicator on the rose point down. Insert the capsule into the side of the mouth and in to the tongue avoiding contact with the teeth. The tail will start swallowing.

   Swallowing must continue throughout the dosing process, and will cease if the head and neck are at the wrong angle, or if your dosing technique is incorrect.

   Slight resistance may be felt as the animal uses its tongue to push the capsule at the back of the mouth. Allow the swallowing reflex to draw the capsule and applicator over the tongue and into the back of the throat.

   NOTE: NEVER PUSH OR USE EXCESS FORCE AS YOU MAY DAMAGE THE ANIMAL'S THROAT CAUSING FATAL INFECTION.

   Dosage and administration:

   - Restraints
   - DIRECTIONS FOR USE:

   DO NOT USE in sheep producing milk for human consumption.

   Dose one capsule for animals between 40kg and 80kg liveweight. For animals over 80kg, dose with 2 capsules. Sheep should be weighed if liveweight is uncertain.

   WITHHOLDING PERIODS:

   MEAT: DO NOT USE less than 126 days (18 weeks) before slaughter for human consumption.

   MILK: DO NOT USE in sheep producing milk for human consumption.

   TRADE ADVICE:

   EXPORT Slaughter INTERVAL (ESI): DO NOT USE less than 126 days before slaughter for export. The ESI on this label was correct at the time of label approval. Before using this product, confirm the current ESI from the registrant at 1800 808 691 or the APVMA website (www.apvma.gov.au/residues/ESI.shtml).

   DISPOSAL:

   Dispose of empty pail and plastic bags by wrapping with paper and placing in garbage. Empty containers and product should not be burnt.

   STORAGE:

   Store below 30°C (Room Temperature). Store in original packaging in a dry place. Protect from light. After opening, ensure bags are sealed by folding over tightly. Secure with tape, to protect capsules.
