

QLAM SQ-35

Digital Foiling | Sleeking | Laminating

The latest addition from QLAM in Europe, the SQ-35 is a stand out manual laminating machine with commercial chrome roller and pneumatic roller pressure designed for quality finishing of digital prints.

Capable of foiling, sleeking and laminating at a speed of up to 8 Metres per minute with a chrome heated roller, the SQ-35 combines internal thermocouple heat with pneumatic pressure of up to 600kg for maximum results.

The European design and components also include “no sheet photocell detection” and foil take up rewind bar for digital foiling and sleeking.

This addition to the QLAM range of equipment represents outstanding quality not before seen in digital foiling and sleeking and is the perfect compliment for precision digital print finishing.

Pneumatic roller pressure to 600kgs

Photocell safety cut out

Accurate feed tray and guide for easy set up

Internal Thermocouple roller heating

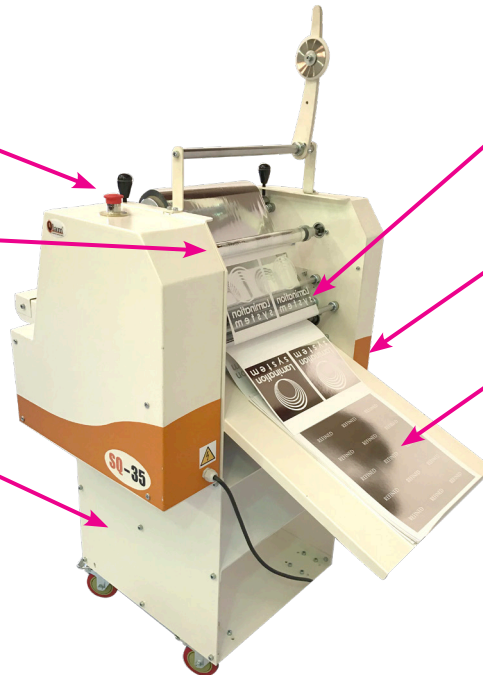

Photocell "no sheet" detection

European design and quality components

Emergency stop button

Bar for collecting foil and sleeking film

Mobile machine storage trolley

Capable of foiling, sleeking and laminating

Compressor included

Catch tray for finished prints

Specifications

Max. sheet width	350mm
Laminating speed	1 - 8 m/min
Paper Thickness	120 - 350gsm
Film / Applications	BOPP / Foiling / Sleeking
Film Core Size	76mm
Chrome Roller Diameter	100mm
Roller Pressure	600kg Pneumatic (compressor included)
Power	AC 230V, 50/60 Hz, 10amp, 1900W
Weight	120kg
Machine Dimensions	L 1240mm X W 760mm X H 1290mm
