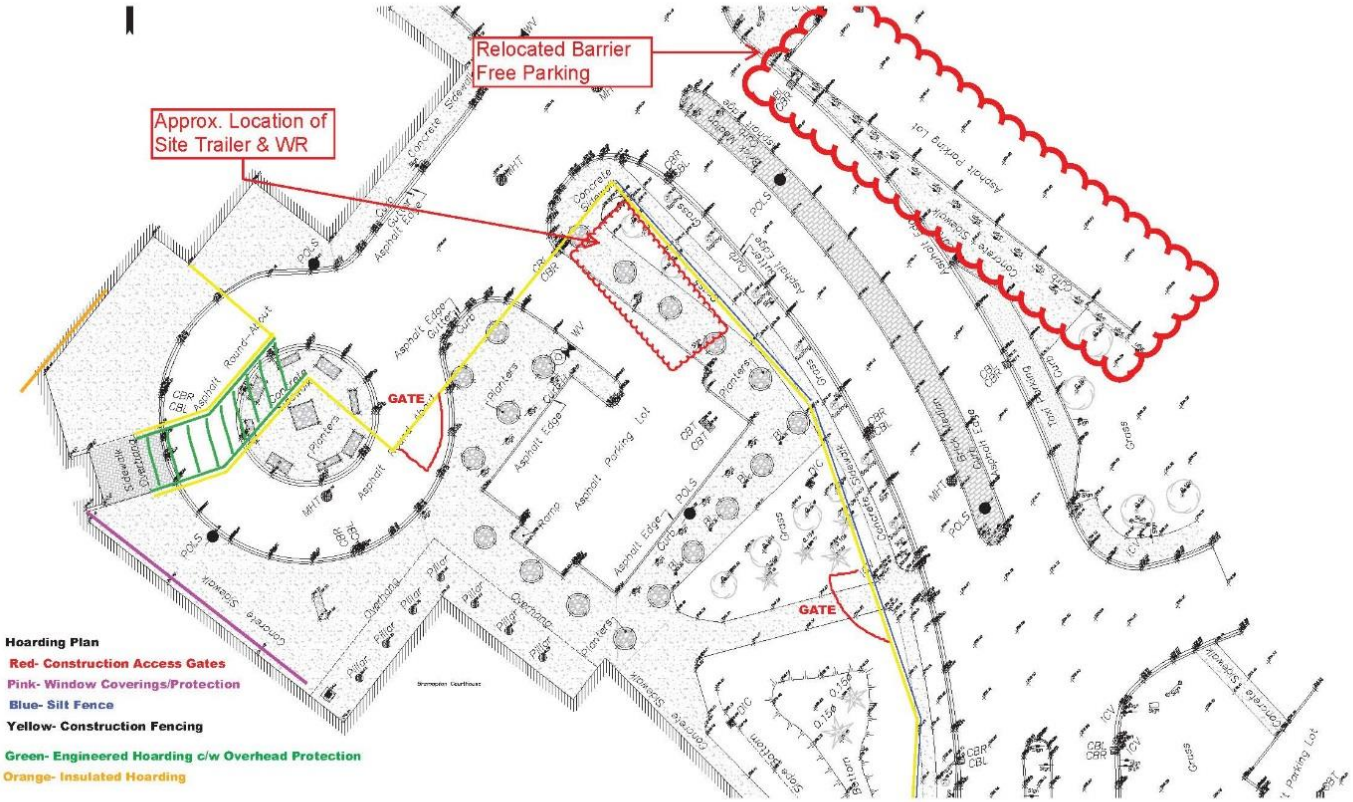
BRAMPTON COURTHOUSE CONSTRUCTION UPDATE

Entrance Modification – January 27, 2017

The project will replace the existing entry area with a new, two-storey structure including an expanded section for queuing, security checks and screening, as well as a second-storey FLIC office.

As a courthouse user, it is important for you to understand what will be happening during construction, as it will affect access to the existing building as well as barrier-free parking and those areas directly in front of the building.

Impacts include:


- Adjustments to vehicular and pedestrian entry and exit routes
- Adjustments to location of reserved and barrier free parking
- Relocation of designated smoking areas in front of the building
