

Practical Strategies for a Superior Court Criminal Trial #5:

CONTENT WARNING

This CPD is NOT a safe space. The subject matter is graphic, and geared to be emotionally and intellectually taxing. As those who have attended these CPDs before can attest, the participants are encouraged to engage in unfiltered and often colourful discussions surrounding race & sexual assault which may trigger a reaction in some who might attend. Some attendees at prior CPDs have become extremely upset. It is our position that when defending a homicide, it is not enough if counsel's sensitivities permits peering into the sausage factory. We believe counsel must be able to look past that, to the killing floor of the abattoir itself.
