Hazardous decomposition of products:

Thermal breakdown of this product during or very high heat conditions may evolve the following hazardous decomposition products: Carbon Oxides and traces of incompletely burnt Carbon compounds. Nitrogen Oxides, Silicone Dioxide. Formaldehyde, Metal Oxides, Sulfur Oxides, Iodine compound and Quartz

6. Accidental release measures

6.1 Containment/clean up:

Observe all personal protection and equipment recommendations described in sections 5 and 8. Wipe up or clean up and contain for disposal. Clean area as appropriate to prevent slip hazards. Final cleaning may require the use of solvents and/or detergents. Dispose of waste as spontaneous heating may occur. Local, State and Federal laws and regulations may apply to releases and disposal of waste material, as well as the material used in the cleanup of releases. You will need to determine the applicable regulations. Sections 13 and 15 of this MSDS provide information regarding certain federal and state regulations.

7. Handling and storage

Note: See section 8 for Personal Protective Equipment.

7.1 Handling:

- Observe normal hygiene standards
- Do not discharge waste into drains

Use with adequate ventilation. Product produces flammable Methyl Alcohol when exposed to water or humid air. Provide ventilation during use to control exposure to within Section 8

- Keep container tightly closed
 - Keep out of direct sunlight
 - Store in a dry area
 - Keep away from ignition and heat sources
- Storage temperature : Room temperature

8. Exposure controls/personal protection

8.1 Personal Protective Equipment:

Eyes:	Use proper protection – safety glasses as a minimum
Skin:	Washing at breaks and end of shift is adequate
Suitable Gloves:	No special protection needed
Inhalation:	Use respiratory protection unless adequate local exhaust ventilation is provided or air sampling data shows exposure to be within recommended guidelines. OH&S/Industrial hygiene personnel can assist in judging the adequacy of existing controls.
Suitable Respirator:	General and local exhaust ventilation is recommended to maintain vapour exposures below recommended limits. Where concentrations are above recommended limits as determined by air sampling or are unknown, appropriate respiratory protection should be worn. Follow OH&S/OHSA respirator regulations (29 CFR 1910.134). Use NIOHS/MSHA/OH&S approved respirators
