Boeing Program Management Best Practice (PMBP)

Baseline Management

Establish the program baselines and a disciplined change process to ensure a consistent reference for measuring program performance. The baselines are managed as an integrated set, and changes are examined for impact across all baselines and across all aspects of the program.

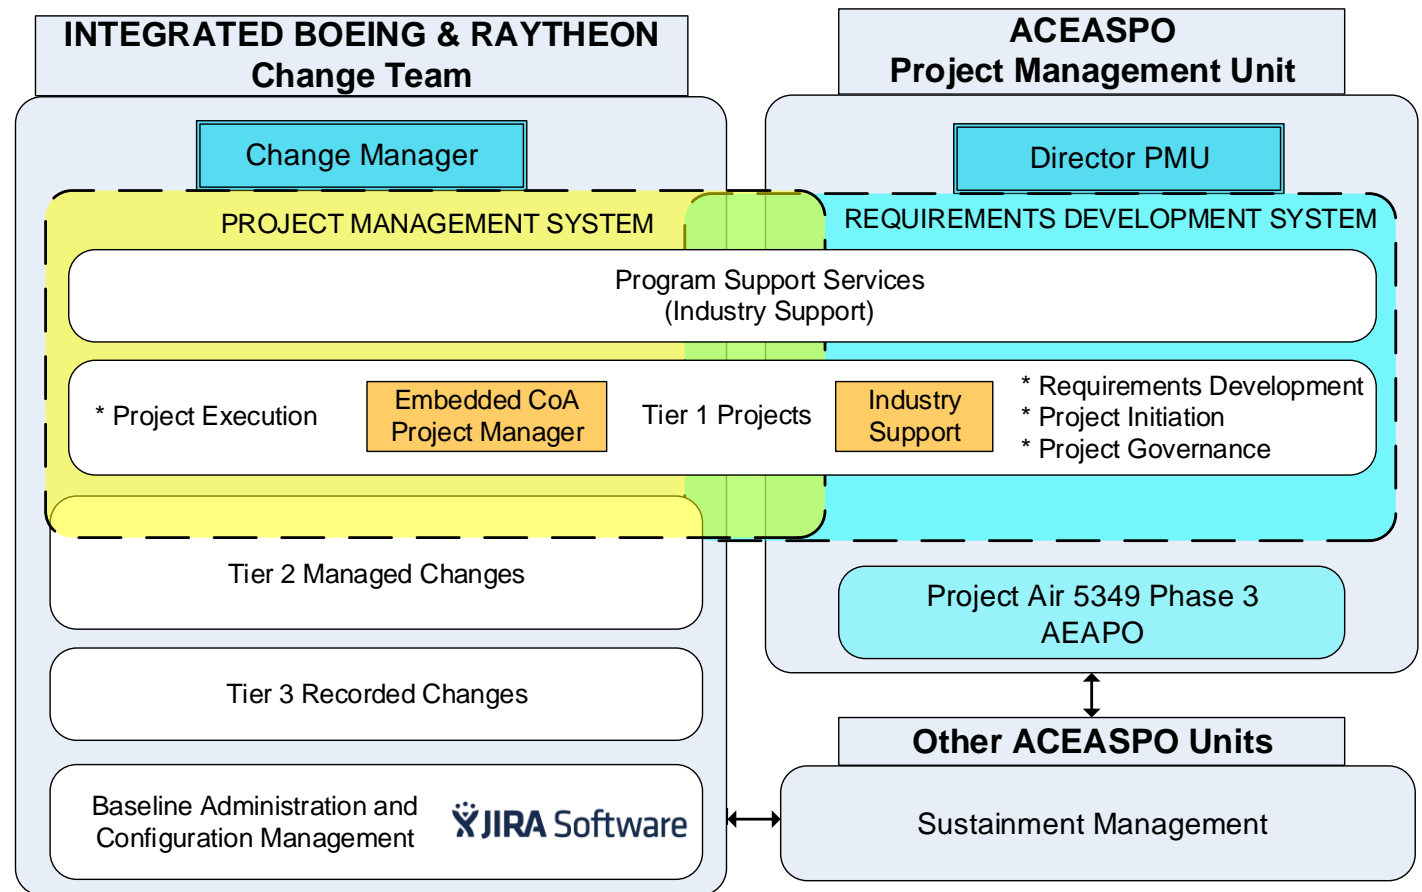

Baseline management is a cornerstone of the PMBP framework and is equally applicable to acquisition and sustainment programs

Change Management - Boeing/ACEASPO Example

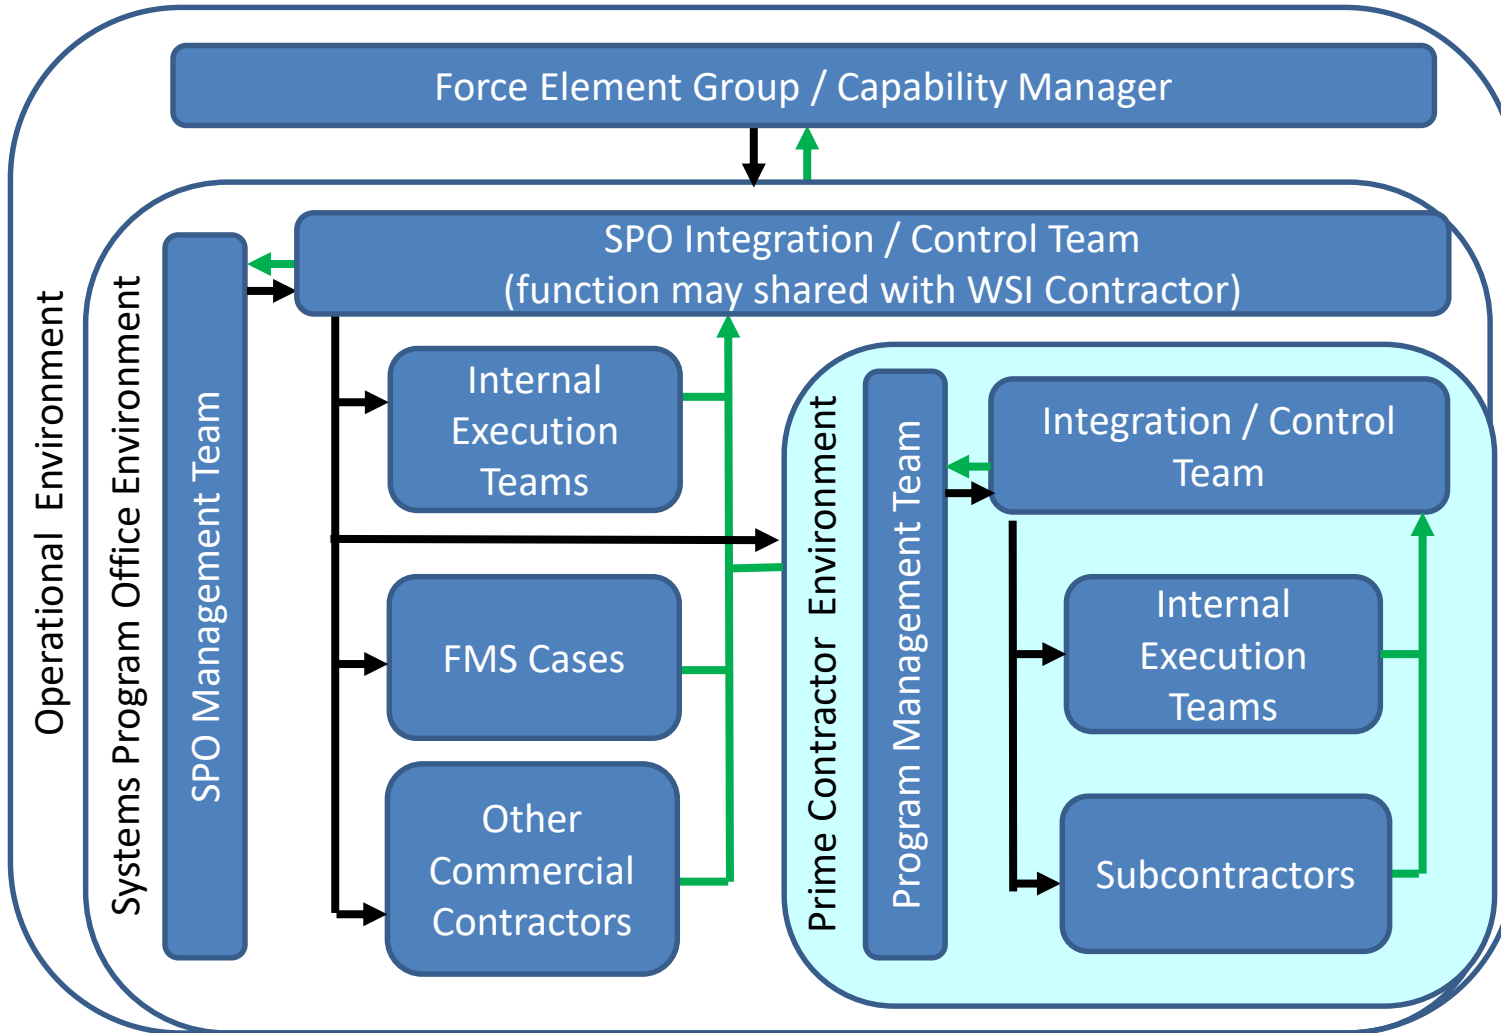

- Baseline Identification & Definition
- Technical v 'System' Changes
- Change Thresholds and Approval Authorities
- Change Management Rigour
 - Tier 1 Project
 - Tier 2 Managed Change
 - Tier 3 Recorded Change

Integrated CoA/Industry Team Approach to Change Management

Air Combat & Electronic Attack (ACEA) Enterprise Capability Change Management Function

Extending the Concept

↓ Requirements & Budget
 ↑ Sustainment Products & Services

Baseline	SPO Level Definition
Cost	SPO Budget Allocation
Schedule	Flying and Exercise Program Project & Task Schedules Cyclic SPO/FEG Events
Requirements	MSA Requirements
TPMs	MSA Performance Measures (SPMS)
Configuration	System Type Record CI Type Records (as applicable)
Organisation	SPO Org Chart & Responsibility Assignment Matrix
Processes/Tools	SPO Plans
Facilities	Assigned Facilities
Other Baseline	etc.

Change & baseline management principles can be applied at SPO/FEG interface as well
