

LAND FORCES 2021

AUSTRALIA INDO ASIA PACIFIC

BRISBANE CERTAINLY KNOWS HOW TO PUT ON A SHOW!

It is safe to say it would not be a “Land Forces Exhibition” without some controversy from antiwar demonstrators. The QLD Police were applauded by attendees in the way they managed each disturbance, swiftly and professionally.

POWERHOUSE Logistics was an official sponsor of the Delegates Lounge this year at the LF21 event providing a quiet break-out area with light snacks and refreshments – a great spot to pull up a chair and have coffee after being on your feet for hours!

LAND FORCES 2021

AUSTRALIAN INDO ASIA PACIFIC

Attending Land Forces is a unique way for us to support our customers who specialize within this sector, discussing **POWERHOUSE's** capabilities and making new connections to create long term opportunities and engagements. It also never hurts to catch up at the networking events when everyone is relaxing with a cold beer or glass of wine and canapes. I (Kelly McGinty) even found myself testing out the UTM training booth at the Danger Solutions exhibit (before the networking of course). I was thrilled to catch up with many people I have known over the 25 + years within my Logistics career, such as CEA Technologies, EOS, Xtek and Eylex to mention a few.

At every LF expo there is always fresh, diverse, and innovative technology driven projects on display - I also love the OOG (Out of Gauge) freight! Size really does matter... It is not enough to just love transporting this type of cargo as one needs several key ingredients to be successful at it such as: in depth logistics knowledge, being a team that delivers ongoing excellence, decades of hands-on experience and the right logistics company to back up all of that. Controlled cargo comes with many challenges and restrictions.

POWERHOUSE LOGISTICS PTY LTD

A Team That Delivers Excellence

Living in a technology driven world means being combat ready across all spectrum's – Defence not only consists of armored vehicles, aircraft and battleships, weapon systems and ordnance. This industry is extremely high-tech and evolves rapidly, operating electronically and remotely. There is equipment on exhibit spanning from unmanned systems, intelligence / surveillance, training & simulation, protective gear to engineering and cyber security.

Increased funding towards R&D and highlighting platforms that support important collaborations with like-minded people, potential suppliers and customers, is one of the many valued opportunities offered at Land Forces.

Thank you to the AMDA team and all the exhibitors! You delivered another great expo, everyone was thrilled to see LF21 proceed after it was canceled last year due to the Covid-19 Pandemic.

HTFN
GLOBAL LOGISTICS PARTNER

POWERHOUSE LOGISTICS PTY LTD

A Team That Delivers Excellence
