

PROJECT REVIEW

PARALLEL REELS

Kerr Engineering were recently engaged to manufacture a series of Parallel Reels for a major mine expansion project in Queensland.

Scope of work

- Machining of the centre hubs and associated components.
- Fabrication and assembly of the series of reels and mounting frames.
- Complete the coating application to the mandated specification.
- Ensure compliance with all applicable AS/NZS, ISO and client specific standards.
- Supply comprehensive MDR's covering materials, manufacturing and coating application.

Outcome

The completed reels were delivered to site on budget and ahead of their required installation time.
