

“Take 3 for the Sea”

“Dear community

I’ve been doing the recycling for many weeks. I’m very sad because there is a lot of rubbish, wrappers and yogurt squeezes. Those things are very bad for the environment. They will stay on the Earth forever and they will cause many bad things for people, animals and trees. If you don’t stop throwing rubbish, in 2050 there will be more rubbish than the fishes that live in the world. So don’t bring or buy foods with wrappers and yogurt squeezes to school. If you bring it to school, please take it home.

The last thing is when you see rubbish on the ground, take it and put it in the right bin. Yesterday I watched ‘Take 3 for the Sea’. In the clip there were two men who wanted to clean the sea. They said, ‘if you see a lot of rubbish each person should take 3 pieces to leave a place cleaner than we found it’. If we don’t start now there will be more rubbish than the fishes in the sea by 2050!”
