At Gilles Street Primary School we believe in a learning environment in which

- students thrive as powered up and empowered learners
- technology is in the hands of learners for anytime-anywhere learning
- personalised tools for learning are used effectively
- online access to information is available when students’ need it
- personal devices support students to move from learning as an individual to sharing and working in collaborative learning networks
- students are challenged to participate in and negotiate the digital knowledge economy, in a safe environment
- 21st century skills they need for tomorrow are developed today

What is BYOD?

BYOD (Bring Your Own Device) is the future for education in classrooms. It is a scheme set up to allow students to have ownership of their very own device. In this case a user friendly online portal is set up where parents are given different device options and can purchase based on their student’s needs. Parents securely order and pay online.

Benefits of BYOD

The BYOD scheme has many benefits. Firstly the parent is able to purchase the latest devices at education pricing. Often if you go into a retail store to purchase a device the specs may be similar at comparable pricing however you only receive 1 year return to base warranty. The advantage of purchasing through education pricing is that it comes with education warranty which is 3 years onsite next business day. The school is also able to help with troubleshooting and repairs if purchased through the school portal.

We understand this is an important investment in your child’s future and education and we are here to help.

How the Portal Works

The portal is very user friendly. You start by signing up and creating your own username and password. You are then presented with the different device options and their specifications. Once you have selected the device you may also look at the insurance options. Add the device and or insurance to your cart and you will be ready to check out. Upon checkout you are given the total amount owing and your payment options.

**Devices**
