THURSDAY 4.00 - 7.00PM

BUILDING DESIGN AND CONSTRUCTION
Students are introduced to some of the underlying principles, regulations, guidelines and building codes that must be observed when taking on a building project. It also provides opportunity to develop and practise a range of building based skills.

CHEMISTRY
Students develop an understanding of the physical world that enables them to be questioning, reflective, and critical thinkers. Students can use chemistry to explore and explain their experiences of phenomena around them. Chemistry is organised so that each intended learning outcome is related to a key idea or concept. Within the study of the chemical ideas and concepts, students develop their chemistry investigation skills through practical investigations and critical analysis of chemistry issues.

FOOD AND HOSPITALITY
Students learn about the impact of the food and hospitality industry on Australian society and examine the contemporary and changing nature of the industry. They develop relevant knowledge and skills as consumers and/or as industry workers.

PSYCHOLOGY
Students gain the skills to understand their own behaviours and the behaviours of others. Psychological knowledge can be applied to improve outcomes and the quality of experience in various areas of life, such as education, intimate relationships, child rearing, employment and leisure.

RESEARCH PROJECT
Students use the research framework as a guide to developing their research and applying knowledge and skills specific to their research topic. They create an outcome, evaluate the research processes used and reflect on the relevance of the chosen capability (or capabilities) to themselves and their research project.

VIDEO PRODUCTION
Students gain practical skills and knowledge in the craft of film making. They learn how to shoot, capture, edit and distribute video using consumer and industry standard equipment and software.

HOW TO ENROL
If you are interested in enrolling in any of our programs, please phone the College on 8159 3100 or visit our website at www.tsc.sa.edu.au and follow the prompts in the Study Options section. Most courses are supported with access to Moodle and online resources.

COURSE FEES
Affordable fees make these courses extremely accessible to all. Centrelink Health Care Card holders may be eligible for SA Government concessions.

WINNER
SA Training Awards 2009
Small Training Provider
SA Training Awards 2008

THEBARTON SENIOR COLLEGE

Thebarton Senior College is a specialist senior secondary school funded by the SA Government. The College offers quality education in a wide variety of South Australian Certificate of Education and vocational training courses. As a United Nations Global Peace school with a diverse cultural community, our students actively learn peace-building and community responsibility in our curriculum. We also provide a range of support services for our students that are unique to our community.

Located just four kilometres west of the city, the college is easily accessed by bus routes 286, 287, 288, H20, H22, H30, H32, H33, B10 and B12 from Adelaide and its suburbs.

YOUR SACE, YOUR WAY

Thebarton Senior College offers Stage 2 students a range of 20 credit SACE subjects in the twilight. This provides students with:

- A variety of choices
- The chance to study a subject of interest
- Small class sizes
- Supportive and experienced teachers
- The advantages that come with one lesson per week:
  - Increased study time during the day
  - Flexibility to undertake part time employment

You can study 1, 2 or 3 Stage 2 twilight classes at Thebarton Senior College while completing Stage 2 at your school.

The College offers the following twilight options in 2017. If you require any further information, please call Keri Fisher, Assistant Principal Curriculum on 8159 3100.

TUESDAY 4.00 - 7.00PM

CLASSICAL STUDIES
Students study the Greek and Roman classical worlds, including literary texts from the period and an area of the classical world that interests them.

CREATIVE ARTS - STAGE, SCREEN AND DRAMA
Students explore acting techniques and apply skills gained in a project of their choice. Drama also provides the flexibility to explore other areas such as production, direction or script design.

GENDER STUDIES
Students look at the world from the perspectives of women and examine the construction of gender and how being a woman or a man may influence an individual's experiences and expectations. They explore the diversity of women's experiences and their relationships to others. They also study gender representation in cultural texts.

GEOLOGY
Students design and conduct geological investigations and gather evidence from fieldwork, experiments, and research. They have the opportunity to engage with the work of practising geologists. This course is part of the GeoFutures program with links to the mining and exploration industry.

LEGAL STUDIES
Students learn about the Australian legal system from the local level to its global connections, its origins and functions. Students learn how laws are made and enforced and the legal issues affecting Australian citizens.

WEDNESDAY 4.00 - 7.00PM

CHILD STUDIES
Students learn about children's growth and development from conception to 8 years and critically examine attitudes and values about parenting and care-giving and gain an understanding of the growth and development of children.

GEOGRAPHY
Geography deals with diverse environmental phenomena and human activities, including population, landforms, tourism, globalisation, resources, agriculture, hazards and urban planning. Students develop an understanding of the spatial interrelationships between people, places and environments.

LITERARY STUDIES
Students read a range of extended texts and a number of shorter texts from past, contemporary, and everyday contexts. They focus on the skills and strategies of critical thinking needed to interpret texts.

NUTRITION
Students explore up-to-date scientific information on the role of nutrients in the body as well as on social and environmental issues related to nutrition. The study of nutrition assists students to reinforce or modify their own diets and lifestyle habits to maximise their health outcomes.

PHOTOGRAPHY
Students learn and apply skills in digital photography, design and photo editing software.

SPECIALIST MATHEMATICS
Students gain the insight, understanding, knowledge, and skills to follow pathways that will lead them to become designers and makers of technology. The subject provides pathways into mathematical science, engineering, computer science, physical sciences, surveying, economics and commerce.

TOURISM
Students develop an understanding of the nature of tourists, tourism and the tourism industry. They investigate local, national and global tourism, and explore tourism as a business. Students gain an understanding of the complex economic, social, cultural and environmental impacts of tourism.
