## LumiPower User Manual – Quick Start Guide

For a complete manual describing how to use all the features of your LumiPower light, please go to the Zodiac Website ([www.zodiac.com.au](http://www.zodiac.com.au)) and navigate to the LumiPower product page.

LumiPower single colour lights are 1 fixed colour (Either Blue or White)

LumiPower Multicolour lights allow you to control the colour of the light they emit. You may choose from:

- A series of pre-set colours;
- A series of pre-set changing light patterns.

The available colours and pattern (in order of selection) are:

- |                   |                           |
|-------------------|---------------------------|
| 1. Alpine White   | 8. Magenta                |
| 2. Sky Blue       | 9. Violet                 |
| 3. Cobalt Blue    | 10. Slow Colour Splash    |
| 4. Caribbean Blue | 11. Fast Colour Splash    |
| 5. Spring Green   | 12. America the Beautiful |
| 6. Emerald Green  | 13. Fat Tuesday           |
| 7. Emerald Rose   | 14. Disco Tech            |

The lights can be controlled from a Jandy Aqualink RS Controller or from the lighting power switch.

When multicolour lights are being controlled from the lighting switch, the following sequence is required to change the colours.

- The first time that the light is turned ON, the colour sequence begins with Alpine White
- To change the colour, turn the light **OFF** and then **ON** within three (3) seconds
- Continue turning **OFF** and **ON** until the desired colour mode (from the table above) is reached.
- When the light is turned **OFF** for more than seven (7) seconds, it will remain in the colour set that is currently active
- When the light is turned back **ON**, the light will be on the same colour set.

To reset the lights to the beginning of the colour Sequence:

- Turn the light **OFF**
- Wait four (4) to six (6) seconds
- Turn the light **ON**
- The Light will return to the beginning of the colour cycle (Alpine White)

Zodiac LumiPower multicolour lights will synchronise with other Jandy/Zodiac Multi-Colour Water Feature Lights such as the Zodiac Laminar Jets).

When the Lights are all controlled by a Jandy Aqualink RS Controller this synchronisation is automatic.

When the lights are controlled by a single switch synchronisation will be achieved through that switch.

When the lights are controlled by more than 1 switch synchronisation is achieved by operating the switches simultaneously.
